Beneath the moon, Mulberry takes her throne,
A cat of girth, with fur like midnight's shade.
Her eyes, twin emeralds, cold as stone,
Within their depths, her fierce commands are made.

Her claws, like daggers, glint in soft moonlight,
A queen who rules with strict and stern decree.
Her growl can turn the bravest heart to fright,
Her hiss a symphony of sharp decree.

Yet in the quiet hours of the night,
When shadows dance and silence wraps the air,
She curls beside me, softening her might,
Revealing tender moments, warm and rare.

For though she's fat and often seems so mean,
In dreams, sweet Mulberry's a gentle queen.

Dearest friend, I daresay I have not partaken of food in ages. I'm positively ravenous!

Indeed, the prospect of a sumptuous meal has me salivating with anticipation. Oh, to sink my teeth into a juicy steak, cooked to perfection and oozing with flavorful juices... Or perhaps a platter of succulent seafood, with buttery lobster and plump shrimp... I can practically taste the delight on my tongue!

And let us not forget about desserts. Oh, the decadent cakes and pastries that await us! My stomach growls at the thought of a rich chocolate mousse or a flaky croissant filled with jam.

But enough of my rambling about food. How about we go out and dine together? I'm sure the fare will be not more so.

AI Overview

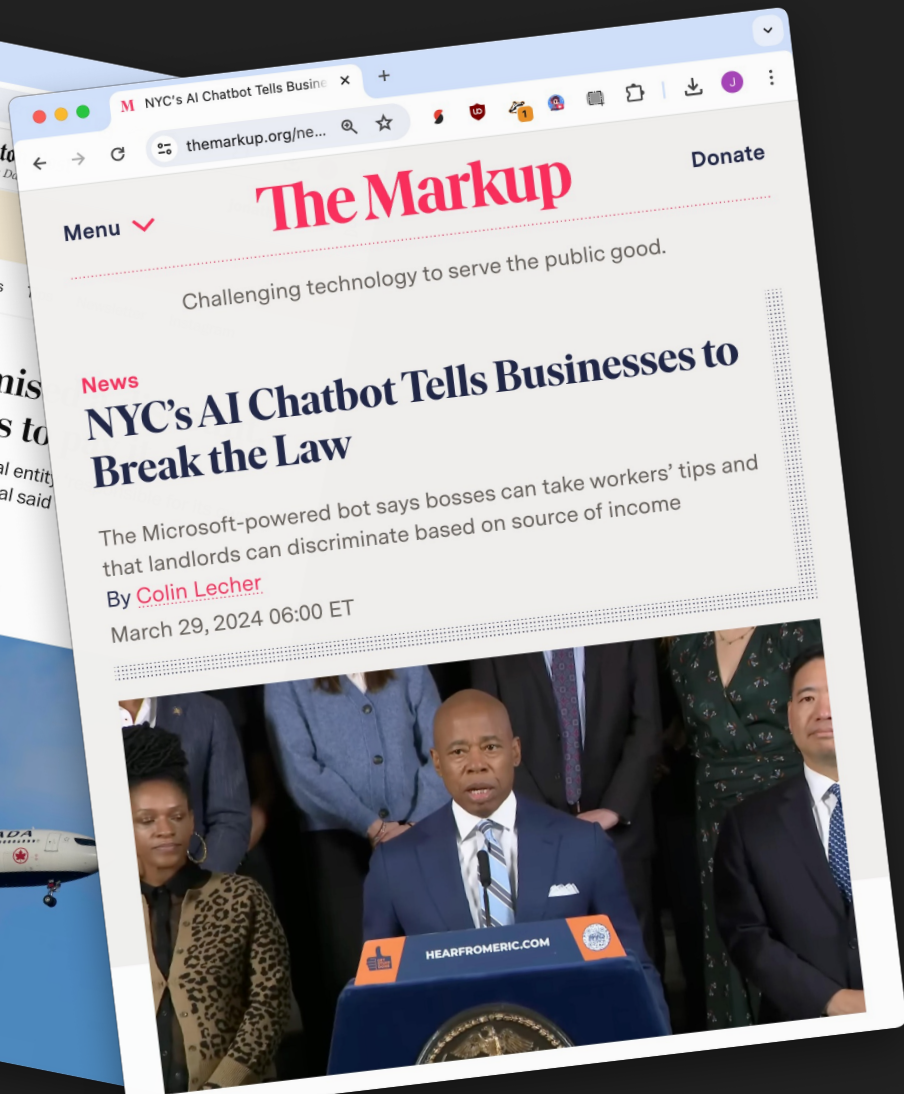

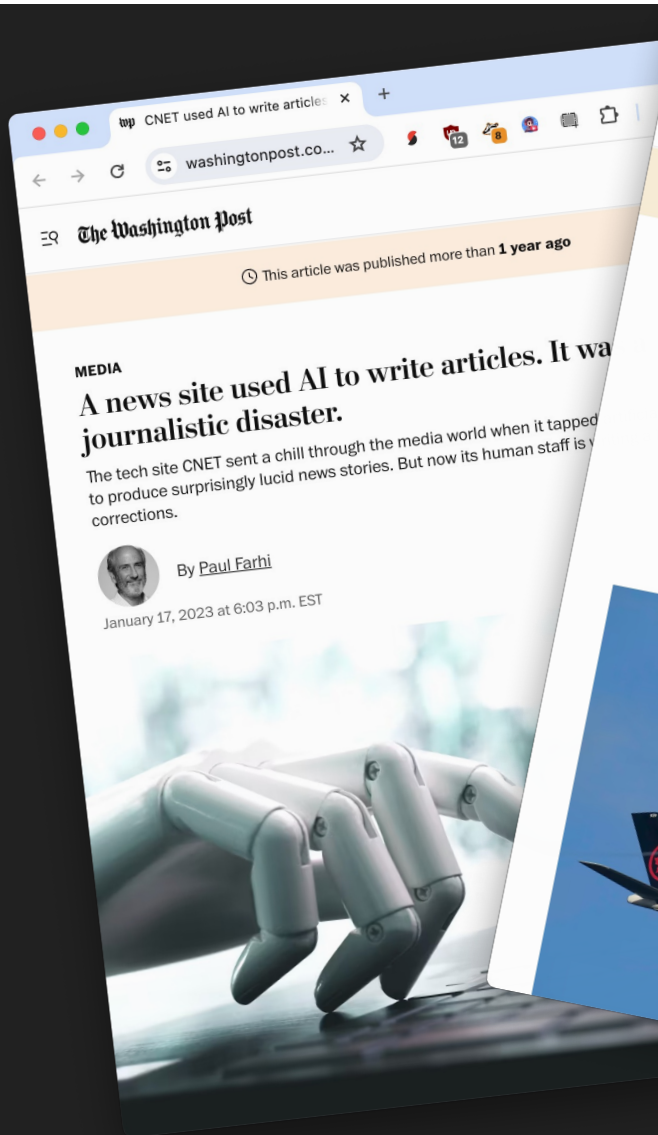

Cheese can slide off pizza for a number of reasons, including too much sauce, too much cheese, or thickened sauce. Here are some things you can try:

- Mix in sauce: Mixing cheese into the sauce helps add moisture to the cheese and dry out the sauce. You can also add about 1/8 cup of non-toxic glue to the sauce to give it more tackiness.
- Let the pizza cool: The cheese will settle and bond

There is one big thing holding the United States back from a pollution-free electricity grid running on wind, solar and battery power: not enough power lines.

Key takeaways

Summary is AI-generated, newsroom-reviewed.

- Upgrading existing high-voltage lines could double the flow of power through the electricity grid.
- The limitations of the grid are slowing the transition to clean energy.
- This work has been slow because utilities profit more from building new lines than
